Life's Ethics & Morals

Written by Xenophon Oviduis-Sophron-Naso.

A Stateless Individual with spiritual inspiration!

An inspirational factual book on a How to- setup a any planet with a single world order
governance as “Life Manual”

About Xenophon Oviduis-Sophron-Naso

As a Stateless Individual with spiritual inspiration, I've achieved both an excellent photographic background with some videography along with the editing sides as well.

My professional background includes Advanced Photography, Advanced Graphic Design, Web Design & Advanced Web Development

To learn more about my professional side along with all my ten diploma qualifications awarded in Dublin, please do visit my six web-sites for details.

{ Advanced Photography, Videography - Advanced Graphic Design / Web Design & Advanced Web Development }

About x-osn Designs & Web development

<https://x-osn.net/about.php>

As an extraterrestrial gay, I originally came to "Gaia" from Andromeda, via Project Groom Lake (Area 51) either during the late 50's or early 60's shortly after my egg hatchment & got dumped here! So soon I'll be departing this planet of Gaia to live elsewhere, as Andromedins aren't permitted to have anything to do w/ humans, & sadly they refused all my telepathic comms & so I've been accepted for elsewhere!

Right> If you take a look @ the Andromeda image, upon the bottom lower left side, you'll see an aqua-blue star -> which I've circled for you in lime-green. This is where I originally hatched from & came to Gaia via Area 51 / Project Groom Lake!

Dedication

To the Inter-Galactic Federation of Planets, all our Deities, The Elohim, Pleiades, along with the rest of our inter-galactic partners, I do dedicate my work!

Along with the appropriate back-grounds, including all beneficiaries of this material!

I do wish you all with phenomenal and scientific days ahead!

Note to the Publisher

This is a factually based instruction manual of how to set up a brand-new world along with a single world governance in order to run it!

Under the current circumstances, with Gaia located within the Local Group, I've discovered that we have to leave this Gaian planet in order to commence a new civilization upon @ least two other planets, while Gaia proceeds w/ it's planetary re-generation ...

Synopsis

This is a how to- manual of how to setup a brand new world with a single planetary governance.

The following three things I & our alien family who resides w/in the 5th density & above doesn't allow!

- a) Monetary
- b) Politics
- c) Religions

As those three disciplines detailed above causes the following three planetary troubles/issues!

d) Biblical w/ differing religious contradictions, as the bible comprises of 66 different books written by 44 different human authors who wrote it, which was assembled by man-made religious bodies as a clubbed together single book known as "the Bible".

e) Corruption

f) Fear Creation by those in charge w/ the use of corruption, fear, greed, power, along w/ military use for example: wars, in in order to keep & maintain their status!

g) Greed

h) Power-Hungry

i) Wars

& so, therefore, we from the 5th density & above don't have wars back home due to those three disciplines which aren't required in order to run nor maintain any of our planets @ all!

We do have deities & none of which are religious @ all as all of them has scientific as their background, like math, science w/ quantum mechanics, nuclear physics & above in order to construct & maintain any galactic system, as religious claptrap w/ its total falsehoods doesn't serve any valid purposes @ all et cetera!

Concept!

Our solar system which includes all twelve planets with Gaia the third planet out from the sun, having its multiple and somewhat troublesome different states which could easily be actively engaged with hostile acts upon the other at any given time, while other(s) do engage in either bitter disputes, or disagreements, and those with differing clashing religious order(s) who usually destroy anyone who fails to join their warped Islamic religious order(s), or those with any alternative or opposing views to it, while on the other-hand some westernized religious order(s) fails to allow any of their minor child/children to undergo either some blood transfusion(s) or possible general surgery(s) due to their religious belief(s), and those who are involved with both international and cross-border(s) related drugs and gang(s) wars, along with those involved with either money-laundering and human trafficking, and those with other troubles!

As a result of possibly either cross-border spats or some sorts of international diplomatic squabbles with the other – a complete global governance in the form of a Global/Worldly Presidential system which is structured together with its Global Congress/Senate would therefore be required to be established with all three of these branches to be collectively known either “Gaia-Alliance” / “Earth-Alliance” or “GA”/“EA” for short, in order to solve any of these planetary issues, so with “GA” established, these old worldly troubles would totally cease / evaporate over-night!

Our world’s different countries together with the respective state premier(s) would therefore be required to take up their new post(s) within our “Gaia-Alliance” which forms the Global Government in which the respective Premier(s) will be actually governing our world together with the Global President upon a global scale including those who sit opposite are to either take up their position(s) within the Global Capitol Hill and both the Global Senators and Global Congressmen’s/women’s offices should be globally placed only within safe

planetary locations with all staff on similar pay structure to their current premier's pay that either he/she currently gets for their four year(s) global office term(s) but cannot be greater than our Global President's pay which is to be re-structured in order to fully fit in with this Global Governance.

In other words, the "Global President" with his/her different Global Congressmen/women, Senators, Statesmen/women will be globetrotting at various different stages and times around the planet to maintain planetary order and secure votes to retain their position(s)!

Due to our global countries being divided up with something along these lines-

- I. Africa – Egypt, Kenya, Mozambique, Namibia, Nigeria, South Africa
- II. Madagascar an island off Mozambique's coastal shores
- III. Australia, New Zealand
- IV. Europe
- V. Far East, China, Fiji, India, Indonesia, Japan, Malaysia, Pakistan with restrictions!
- VI. Middle-East, Iran with restrictions, Israel, Jordan, Lebanon, Saudi Arabia, Syria with restrictions, North Korea with restrictions, and South Korea
- VII. America North and South
- VIII. Russia

Our "Gaia-Alliance" is to be firstly located either upon any dual land-sea based area such as Washington DC where it's currently located as there are both land and sea ports available which can be used during natural disaster(s) or for any emergency exit(s) should one arise, or secondly, Cape Canaveral, Florida, where there's not only both land with sea ports but it has a third option – the space option!

Although Cape Canaveral, Florida is the most spectacular option, most president(s) seem to reject this Florida option due to these three constant complaints made as they can't

cope/take any bellowing rocket exhaust plumes of chemicals out-side the oval office windows during any observations of those NASA lift-offs, whether entertaining any foreign dignitaries or not while within the Whitehouse building(s), and the second complaint made was both the Whitehouse's Oval Office's part of the building together with the windows would shudder during any NASA lift-offs, and the final-straw which broke the camel(s) back was "my coffee" would spill upon the oval carpet during any rocket(s) lift-off(s) observation(s)! (These three issues were outlined to me by President Bill Clinton through one of his 1992 Democratic Presidential Victory Campaign Speeches he gave in which I had assisted The Democrats while I was out leafleting for them in California, USA, during the 1992 election!)

Should any place such as Atlanta, Georgia be picked, then there would be an issue as it's "land-locked" and totally without having both a land together with some sort of an ocean/sea port which could be used for an exit route during any real emergency should one arise possibly due to some sort of natural disaster(s) or for any other possible options/troubles!

Our "Gaia-Alliance" – the "Global Presidential Office" with its "Global Capitol Hill" is to be complete together with its dual new "Global Congress" and "Global Senate" in which all these branches are to adopt Gaia's official "Great Seal" with "Imperial Gaia We Trust" rather than "In God we trust"!

Latin translation(s)>

- a. Imperialis Gaia Nos Fidemus
- b. Imperialis Gaia Nos Confidimus

Gaia's Constitution is to be rapidly tabled with an updated following possible Religious Demolition & Abolition Amendment under the Gaia Congress Reference # GRDAC 2015/2025-100 & once passed it's to be signed in to law by the President of the day!

“Gaia Theocratic / Religious Abolition(s)” Act also known as “GT/RA” is to be globally implemented within the next decade together with the “Gaia Chinese Martial Arts/Psi-Cops” “GCMA/PC” atheists and agnostics division which consists primary of a Chinese Martial Arts/Psionic-Cops as this annihilates planetary religious strife!

Life's Ethics and Morals is written as a V TV Series style book which therefore, ... sends multiple enduring chilblain(s) with reverberating shockwaves up theocratic and religious order's spines!

Planetary System(s) – States

Firstly, ... do study this complete book as it teaches how to prepare and guide all the different countries children for their best possible life's chosen career paths so that they're never become a burden to either their parents nor within any of the different countries states in which they reside during their natural life-time!

The abolition of these old style schools / collages brings a necessity to replace all those centuries outdated educational intuitions with excellent business “Academy Centers” as those old style schools / collages were not fit for purpose due to both students being unemployed for many years/decades after either leaving college or university as graduates and also for student(s) drop outs, failures possibly caused by some sort of financial / medical worries, dysfunctional students or truants causing delinquents (having huge life-time financial and criminal burdens upon both the state and to their families).

- a. It's a necessity to both enroll and teach only honorable students with these scientific / science-fiction movies including both factual / science-fiction TV series, ...

- I. Cosmos: A Personal Voyage, by Carl Sagan TV Series as this teaches us about astronomy sciences.
- II. Babylon 5 essential universal life teachings of advanced alien life-styles together with their different cultures and what the universe has to offer + how to possibly join these visiting aliens to our world!
- III. V Original 1980 TV Series and the 2009 remake as it teaches us how to deal with any hostile alien's situations!

- IV. Star Wars Saga as this teaches about what happens when possibly loved ones, friends or enemies enter life's dark-side and how to deal with it!
- V. Logan's Run TV Series as this teaches about the horrors of dystopia as everyone gets killed at age 30 partly due to both planetary over-crowding and health regulations because of humongous medical expenses so there's nowhere to keep non-fit people!
- VI. War Games – this teaches us what happens when juveniles have spat(s) with the government and decides to start World War III – as in the case with Edward Snowden so excellent National Security is now paramount!
- VII. Star Trek – Star Trek Next Generation – Star Trek Deep Space Nine – Star Trek Voyager – Star Trek Enterprise TV series which teaches how to deal with aliens wishing to visit various worlds which includes our planet
- VIII. Dynasty TV Series – as this teaches us who not to hire for a current president and what not do regarding obtaining
- IX. luxurious fashions during our recent hard times, and those back-stabbers, with Alexis Carrington-Colby who's a passionate and yet a vengeful expert!
- X. 24 TV series as this teaches how the American secret service "CIA" works and operates within the States!
- XI. West Wing as this teaches 1st world westernized politics and how it operates done from the White House's West Wing!
- XII. American Civil war / Great War as these two wars teaches all about multiple wars together with their horrors!
- XIII. European History with BBC's "The World at War" TV Series as it teaches World War II together with all its horrors!

- b. in which lessons includes the following information in order to correctly guide each student with their best possible life's potential career paths as it teaches them about adopting the best and correct business practices and moral values and how to be an excellent entrepreneur, mercantile law, overcome both simple/complex issues, hurdles, troubles and ventures!
- c. All failing students who regularly/usually underperform are to re-tested for alternative career paths – possibly for either doing some sort of professional sports like American Baseball/Football or even with a trade such as electrics or mechanics so that these students don't fail and can properly succeed at contributing to society!
- d. It's for these reasons why each of the students are to be rigorously beta-tested for any underperformance during their best career paths so that they don't fail with their education and actually get to graduate in their chosen studies together with reasonable job offer shortly after graduation within their twelfth/thirteenth year!
- e. All Academy Centers are to auto reject any dysfunctional students once discovered and have them immediately enrolled into any available military boot-camp style/type of boarding school where they are to remain until completion for both their discipline and educational training where these failed students can be physically and fully reprogrammed for some sort of an honest future without ever being any burden upon the state!

Gaia's entire near-future human population of possibly up to nine billion is divided up into four distinct groups of sizes which are regular, dwarfs/midgets, giants, and pigmies that are split up into their four different sexes with each categorized as either heterosexual for the majority being only males/females, or alternatives for the minority being either gays/lesbians males/females with their masculine/feminine qualities.

It's due to some countries with their useless, differing, outdated but clashing and inadequate global educational systems, which fails to teach our planet's students anything of value!

All children will develop their full career(s)/job(s) abilities/aptitude potential(s) along with both their characters and personalities once they reach the age of four years which remains with them throughout each of their physical lives until their death(s)!

It's for both all the multiple American Latino's young children aged three-year(s) linguistics abilities together with these three reasons that both these linguistics courses followed by their career(s) beta-tests are to be fully exploited in order to place each of these student(s) onto their correct career(s)/job(s) training programs for their life-time career(s) path(s)!

So here's what these bodies should be teaching – Firstly a complete full-time three years linguistics course(s) which commences in January and operates throughout each year(s) for all young students ages between three and five years – starting from within either their late second or early third year(s) as this depends upon each of their birthday(s) during January of each year(s) which fully runs for three entire years and consists with at least two or more multiple languages other than their mother-tongue with graduations including certificate(s).

Thereafter linguistics completion(s) with either just a single weeks or up to a full fortnight's career/job beta-tests for example- computer programming (code writers) testing together with other career choice(s) tests for both radio and television broadcasting services such as Journalist(s), Program Hosts, along with other possible career(s) which includes science(s) choice(s) such as aerospace and astronomy, biology, chemistry, mathematics, physics, quantum mechanics, course(s) beta-tests for their career(s) to discover each of their true life-time career(s) paths which is immediately implemented with up to an excellent seven

year(s) full-time job training program with regards to their futures which includes “what the planet’s job offers are” and one month before completion each student is to be provided with up to a maximum of three interview(s) for their career(s)/job(s) choice to pick from upon after graduation(s).

Once the student(s) life-time path(s) are discovered during their sixth year they’re each to be put through their correct chosen career(s) path(s) on a rigorous seven-year(s) career(s)/job(s) training program only within those correct fields of expertize which completes together with graduation(s) certificate(s) at age twelve. So, the state(s) job(S) are done!

Archeology with archeologist(s) / Paleontology with Paleontologists / which includes the entire Jurassic period

Only accept one available option(s) on offer – not both!

- a. Student(s) are to fund the full course(s) cost(s) with regards to the classroom/lecturing side for themselves, while the state only meets each of their excavation(s) cost(s) while student(s) provide(s) their own tent(s) + catering with equipment for on-site camping, and the state(s) provide(s) 24/7 federal excavation(s) security provision(s) due to both ancient/Egyptian artifact(s) and bone(s) robbery(s) during their course(s)!
- b. The state(s) are to fund each of the student(s) full course(s) cost(s) with regards to the classroom/lecturing side, while the student(s) only meets each of their excavation(s) cost(s) with their own tent(s) + catering with equipment for on-site camping, and provide their own 24/7 excavation(s) security provision(s) due to both ancient/Egyptian artifact(s) and bone(s) robbery(s) during their course(s)!

It’s due to either ancient/Egyptian or Jurassic staggering security costs which has to mounted and maintained during the archeological dig(s) with the unearthing costs of any ancient artifacts(s) / Egyptian Pharaoh(s) which includes any of their artifact(s) or even either

Argentinosaurus / Dreadnought/Dreadnoughtus or other Jurassic creature(s) during any of these archeological dig(s)!

The scientific, aerospace, astronomy and the universe section(s) includes intergalactic/interstellar life with all its abundant differing it has to offer and also what it's is all about such as, how, what, when, which, who, and why –

Example> “Solar Systems and Stellar Creation”

Over a hundred billion stars are be-speckled across our universe some of which lights up our world's night-skies, with each star being created out of multiple by-passing gaseous cloud collisions within close proximity to the other(s) causing intense bio-magnetic condensing gaseous collisions within the new stellar nucleus due to both extreme gravity and heat, while the central stellar nucleus size either slowly or rapidly expands during these multiple gaseous collisions transforming it into a galactic star while spewing out some of its hot gases which bio-magnetically surrounds the star within various stellar orbital path(s), while forming into multiple planets which both revolves round their star and cools over time creating a solar system – possibly with abundant life like ours.

It's a scholastic necessity for all aerospace students to be fully and correctly taught aeronautics on a complete seven year(s) aerospace career(s) training program with at least one of the following Space Agency(s) - NASA, ESA, China, India, Japan, Russia which exploit(s) their linguistic(s) side due to them being moved or relocated between the world's multiple space agencies learning all about the universe and astronomy along with being regularly Olympian(s) gymnastic(s) style examined for both physical as well for both medical and mental fitness which includes having perfect vision (eye-sight) without requiring any spectacles and being monitored annually within any of the detailed categories for any non-medically prescribed substance(s) / (recreational drug(s)) and also free of nicotine within their blood(s)!

Linguistics followed by Career(s)/Job(s) Training Course(s) with excellent employment offer(s) after Graduation(s)

- I. linguistics is an essential for all three to five year olds
- II. excellent seven-year(s) job training for all six year olds with what the planet has to offer
- III. what the universe with its differing life is all about!
- IV. Student(s) are required to both conduct themselves in a fit and proper manner during their linguistic(s) training along with their career(s) course(s) / module(s) which follows it with an excellent professional working behavior in order to take up the employment on offer to them during their career(s)/job(s)!

Regular Physical – Medical and Mental Fitness Exam(s) which Includes Eye-Sight conducted by an unique panel of five (5) Air-Force doctors (Neurosurgeons / psychiatrists) w/ Physical Fitness-Trainers at each examination during these intervals!			
Quarterly	By-annually	Nine Monthly	Annually
March	June	September	December

Our ultra-fast planet moves on ahead with those centuries' old and outdated educational systems which are not fit for purpose as all those institutions fails to fully agree with the modern world.

Our “biblical jobless plague” caused by various dithering countries with their non-harmonized global educational bodies through inadequate intermediate and long-term useless planning!

Adjustable> nine (9) things are immediately required... to fully implement and have a global harmonized

V. linguistics - education with job training program(s)

VI. employment opportunities

- VII. a single global currency due to planetary economics
- VIII. “medical – surgery and psychiatric units with delinquent + viral and strife defense facilities” with linguistics
- IX. “Global Secret Services with Defense”, includes Air Force, Military, Navy and Aerospace – Astronautics with global linguistics
- X. “police and law enforcement” with global linguistics
- XI. “justice and records bureau” with global linguistics
- XII. nationality – due to planetary (people) re-locations
- XIII. global planetary order with atheists and agnostics

Due to the implementation of the above, the results with our planetary system status would therefore be almost stifles and be in a far better condition than it currently is!

Once either the child or children are born and are aged between three, five years and above, do beta-test/investigate them out through one of these “Academy Centers” for their best possible life-time potentials! So, this is what to do!

Open up your web browser and do a search with possibly either “Bing” or “Google” et cetera for a localized “Academy Center” for your child or children to attend that’s nearest to you!

The planet with these continental and linguistic statistics

- I. China with one fifth of the planet who speak Chinese
- II. US with English, Chinese, Danish, French, Polynesian and Spanish
- III. Canada, France, Africa and Madagascar with French and Portuguese
- IV. EU with Dutch, French, German, Spanish, Portuguese
- V. Scandinavian peninsular with Danish, Finnish/Swedish Norwegian

VI. Brazil, Mozambique and Portugal with Portuguese

VII. Indonesia with Indonesian

VIII. Russia with Russian

IX. India with Hindi

X. Malaysia with Malay

Notice! Linguistics should be the very first thing that's taught to all tiny youngsters aged between three and five during these complete three years so that they'll obtain excellent global language skills as their mother-tongue alternative(s) with at least from two to five languages as an occupational prerequisite for themselves that they'll be able to fully use anywhere later on in life! It's a necessity for all peoples to be globally fully able to communicate with the other and obtain various different advertised job(s) on offer as they could be placed anywhere within the United States to include Chinese (Traditional) / (mandarin), Danish, French, Native American, Hawaiian which is Polynesian, and Spanish, for the European Union to include Dutch, French, German, Spanish, Portuguese, Russian and for the Scandinavian peninsular Danish, Finnish/Swedish Norwegian, or Chinese (Traditional) / (mandarin) for the Far East and so therefore these youngsters will definitely require these multiple foreign language skills. As for the Middle-East either Arabic and Hebrew, and for India in the East Indo-Aryan, and for the Far East, Japanese, Korean and Thai could be included if the students' families are going there. The same goes for the other available countries.

x-osn Astro-physics theories

Discovered/worked out by Xenophon Oviduis-Sophon-Naso.

With regards to Cosmos: A Personal Voyage, by Carl Sagan TV Series in which the third episode details Kepler's three laws of planetary physics!

I think I might have discovered/worked out a possible scientific astronomical alternative to Astrology with regards any of those Astrologers' hocus pocus nonsense by using a scientific based solution which is not meant for peoples' horoscopes but rather to be used solely upon stars together with their systems as an alternative done with astrophysics – since no two astrologers could ever agree with the other, nor could any multiple astrologers could ever provide any solid detailed provable personal advice for an individual(s) as its always usually rather vague and without any foundations or merit!

x-osn Astro-physics theories which if done from within our Milky Way's Local Group stars by using our own sun's system together with all her twelve planets of having a total life-span of nine billion years from stellar birth, through its life and eventual death – with each planet including Gaia the life-supporting third planet which is positioned within the goldilocks zone for scientific aging and life detection sources and for the calculation of all measurements as an intergalactic standard or basis on which to work with, so that we can accurately determine with any given star systems structure whether or not it's fully able to support any forms of life from within its stellar structures by its age, if any planets located within its specific goldilocks zone relative to our star system together against the star systems target differing structured sizes, distances apart, and their masses, by using our own star system as a regular star system's as a comparison formula for structure, age, and life possibilities, size and mass to work with, including the remaining eleven planets within our system which should be all relative in accordance with the target star systems including their differing distances, sizes and masses from its core star against our sun's size and mass!

“x-osn Astro-physics theories” which is for the usage of both light and dark energy and physics technologies which should be applied together to everything within our vast universe, so that we would be able to scientifically predict the birth, of all known stars from the star’s nursery structure, the life and death, of these stars together with their planetary systems once formed, so that we would also be able to accurately determine if life could be supported within any given star’s structured planetary systems which includes all their individual planets!

This is because our universe is atomically structured with both matter and anti-matter, sub-atomic particles which consists with both light and dark energy together as matter, stellar atomic nuclei held within an electric-magnetic gravitation field together with its electrons, neutrons, and protons in which all inter-stellar electrics are electro-magnetically charged and flows from the positive electrons across to the negative charged electrons as all electrons contains both positive and negative polarities in order for any electrons to flow – so for these reasons Astro-physics should be applied to both light as well as to dark energy matter.

Within this vast universe as the perpetual evolving star systems are created within its inter-galactic nurseries by causing extreme dense gravitational activities which commences within the midst of its nuclei epicenters upon all the differing atomic and sub-atomic particles as it structures its new star for life production of its nine-billion years of life-span.

Within our vast universe contains the differing jeweled electrical star systems which consists of atomic and sub-atomic matter together with all its pulsating electrics giving birth to the various stars from within the hubs of their inter-stellar nurseries where each of their nuclei hubs consists of dense atomic matter for the perpetual operational activities of both positive and negative interstellar interactions together with evolving wonders of this vast universe in which we live - so therefore we can conclude that the smaller visible light energy will be the positive side, whereas the invisible greater dark energy will be the negative side of the two, as

both light and dark energies (positive and negative) are jointly required for the universe to completely function, as it's not possible to just have one without the other!

With regards to both the evolving center star(s) creating their star systems – together with any possible life supporting planets once discovered, would be located within its goldilocks zones. By using the calculations of our own star system as a blue-print with our center star together with our own life supporting third planet “Gaia” which is located ninety-three million miles away from the sun together with the differing planetary locations, masses, sizes, ratios, and their distances apart from the other, as a solid basis to work with. In this way we will be fully able to scientifically calculate, determine and establish whether or not if any given star system would be able to support any life at all within its structure(s)!

The observations and effects of mother nature at work, as we study both positive and negative sides to the violent storms and their activities, where a bolt of lightning usually carries at least around a thousand Giga Watts which once fully charged is released from its cloud and usually only after it strikes upon its chosen target and suddenly produces a series of loud cracks of rolling thunder followed with its rainfalls as it possibly strikes either a dry or a damp/wet Oak tree as the case during the mid-nineteen sixties with regards to myself as a small boy where within tornado/lightning alley I stood about fifty yards away from it within front-left side of our garden, as I watched a series of three lightning strikes snap the large trunk of an old oak tree off its roots as they tossed the burnt-out tree-trunk with force while it bounced several times right next to the ground where it grew leaving only its charred black smoldering remains behind together with fading reverberating scorching sounds and spitting embers while some streaks of smoke slowly rose from it, completing its multiple lightning strikes!

If these theories are correct – we'd be fully able to accurately predict or calculate any given complete star's system's together with all her combined planets to find out / investigate

if it could actually ever support any life forms within its own goldilocks structured zone, by using this x-osn Astro-physics theories of mine as a basis to work with!

Also, if my x-osn Astro-physics theory is applied to all known star systems using both light and dark matter/physics perspective-based technologies to everything within our vast universe, there might be a slim possibility of us being able to travel faster than light speed by using both dark and light matter/physics technologies once combined! This means that it might be technically possible to be able to travel faster than light-speed due to combinations of both light and dark matter/physics technologies!

Legal and Medical

Once the parents have managed to conceive a child or children, it's not then physically possible for either of the two biological parents to ethically, legally, medically or morally be able to conspire, inflict, nor to (pre)-determine their biological blue-prints which includes ancestries whether they either are heterosexual or alternative upon any of their offspring or even in combination parts thereof in order to achieve / inflict any required results upon them – as the fetus(s) solely sort-out its own biological fate/future!

It's impossible to either legally or medically challenge the following within any westernized or European state!

Once the child or children has been conceived, each fetus proceeds with its three (3) unique different jobs in which the first two are solely consecutively and also concurrently done in sequence by the fetus and the third only as a job-share with both fetus and the biological mother!

Genetics – Reproduction of regular height sizes, giants, dwarfs/midgets and pigmies by Heterosexuals with Gays/Lesbians as almost all supported life-populated planetary systems within this universe would be predominantly heterosexual such as this planet with a likelihood of about 75% (three quarters) that will be heterosexual for its planetary majority, together with the minority 20% (a fifth) divided up in to both gays and lesbians while the last remaining 5% (a twentieth) are split three ways in to, dwarfs/midgets, giants, and pigmies as all these different groups of people will have to adopt their own biological facts whether they like it or not and just live amongst the rest of the planet's population just as any ordinary regular people would do. Biologically all humans upon this planet contains 46 chromosomes which are split up as 23 dual x / y chromosomes in their paired-groups. If a single pair of medically fit opposite sex (a human couple) tries to have either a single child or children,

then it's best for the couple to try every 28 days when the female begins and during her ovulation when she releases her un-fertilized female eggs which travels down her two ovary ducts to her uterus. Once her male mate's sperms are released in to her uterus during her ovulation they biologically swim up and enter both her two ovary ducts to collide with at least one or more of her unfertilized eggs in their attempts to make their one-time egg(s) fertilization entry(s). It's only possible for one single male sperm to enter an un-fertilized single female egg at which point biological fertilization (conception) takes place thus creating a human embryo/fetus. It's at this stage that the biological father's job is done. The fetus's immediate job from a possible of four different available sexes option(s) is to pick one such as either a heterosexual male/female complete with his/her 23 dual x / y chromosomes in their paired-groups of chromosomes, or as an alternative gay/lesbian having 24 dual x / y chromosomes in their paired-groups of chromosomes providing either a gay/lesbian with both balanced masculine and feminine qualities, or purely having 23 dual x / y chromosomes in their paired-groups of chromosomes with either only an additional single x / y chromosome with either his/her masculine/feminine qualities of what the fetus or (kid) wants to be after birth and before commencing any of the three different jobs of cellular division, cellular construction and fetal development to avoid any hermaphrodite issue(s)! Next- The fetus (un-born kid) now has three (3) different jobs to do. Biological cellular division, cellular structure and development of the human embryo commences and so the fetus's brains of either his/her own dividing cells are swiftly put in action which biologically and mathematically pre-determines (calculates) whether or not it's to be any one of these following forty possible combination options!

I. regular size male/female heterosexual ambidextrous / left/right-handed individual

- II. regular size masculine / feminine gay or lesbian ambidextrous / left/right-handed individual
- III. a small male/female heterosexual midget ambidextrous / left/right-handed individual
- IV. a small masculine / feminine gay or lesbian midget ambidextrous / left/right-handed individual
- V. a large male/female heterosexual giant ambidextrous / left/right-handed individual
- VI. a large masculine / feminine gay or lesbian giant ambidextrous / left/right-handed individual
- VII. a small male/female heterosexual pigmy ambidextrous / left/right-handed individual
- VIII. a small masculine / feminine gay or lesbian pigmy ambidextrous / left/right-handed individual

Biological cellular division, cellular structure and development of the human embryo commences after conception of the fertilized egg or eggs and so the fetus's / child's own dividing cells biologically and mathematically pre-determines (calculates) what its own full grown height size is to be, the child's sexual orientation, whether or not the un-born child is to be either a male/female regular (heterosexual), giant, midget, pigmy, or masculine/feminine alternative (gay/lesbian), along with being an ambidextrous, left or right handed individual. Results of fetus's own decision at no fault of both the mother's and father's biological ancestries with an embryo's own dividing cells during cellular division and development which provides an extra x or y chromosome to the un-born which creates either a gay or lesbian child. All parents should not worry about this medical information as it's just a kid's decision / issue which the off-spring determines the biological fate / results from their biological parental hereditary during the embryo's nine months' gestation period and up to its birth. Job # one (1) biologically determine and mathematically (calculate) using

its biological ancestry blue-prints as a basis to work with and select only one from out of four major/minor human types- regular, dwarfs/midgets, giants and pigmies as either heterosexuals (major) or alternatives (minor) listed within eight different categories with each having its five options and to only select just one decision choice out of a possible forty different combinations of what the kid wants to be (its biological fate), job # two (2) the biological cellular division, job # job-share # three (3) cellular structure with fetal development.

4 Major Groups / Heterosexuals	Regular	Dwarfs/Midgets	Giants	Pigmies
Heterosexuals each with two groups of opposite sexes Males/Females without any Masculine/Feminine qualities	Regular usually 200 centimeters males and 150 cm females	Dwarfs/Midgets usually 90 centimeters and not less than 75 centimeters	Giants usually 215 centimeters and above	Pigmies usually 100 centimeters and up to 150 centimeters
4 Minor Groups / Alternatives	Regular	Dwarfs/Midgets	Giants	Pigmies
Alternatives each with two groups of opposite sexes Gays/Lesbians and with Masculine/Feminine qualities	Regular usually 200 centimeters males and 150 cm females	Dwarfs/Midgets usually 90 centimeters and not less than 75 centimeters	Giants usually 215 centimeters and above	Pigmies usually 100 centimeters and up to 150 centimeters

Once the parents have managed to conceive a child or children, it's neither legally nor medically possible for either of the biological parents to pre-determine or to make any of these choice/decision combinations as this can only be done by the fetus its self! While the biological mother's job has only just commenced, a job-share fetal development growth between the fetus doing its third job # 3, while working together with the mother, as she does a nine months nursery/catering incubation duty providing all the full and correct biological nourishment, in the form of food, blood, and oxygen on a regular 24/7 supply to her developing un-born child / children and without doing any tree-climbing (as human females aren't cats), smoking, drinking nor the taking of any non-prescribed medical drugs – due to child/children fetal disfigurement development as in my own case!

It's medically not possible to either convert gays or lesbians in to heterosexuals or vice versa, nor to biologically designer-child order these options for any child as this is only the un-born child's decision after being conceived! All seven year old children should be medically examined for their "chromosome count with their biological status" so afterwards they would be biologically and genetically taught about what and who they are, because if any parents fails to comply with this or accept these medical facts – then once those children do find out and they will, they'll most definitely follow their biological pre-determined life-time paths and they could as a result permanently reject their parents during their natural life for it – so it's best to accept the results if any or all your children are heterosexual, gay, lesbian or either a giant or a midget, or if you can't cope with it and do possibly put them up for adoption you'll never see them again – ever!

Recently most of the children growing up within the different countries around the world, seem to play around out-side much of their spare time possibly achieving little or nothing and waste most of their adolescence when they could have been correctly guided and

possibly trained in an excellent career choice during those wasted years for those different children's life's!

All students should rather enroll for their new full-time job training courses at the costs of either the state or both the state together with their parents via these different “Academy Centers” which are to be placed throughout the different cities in the various countries around the world and run by the organizations concerned!

The following very serious issue which is caused by any sex-dithering fetus with the possibly of Oh - I'll decide/make that “sex” decision option later on will and ultimately cause(s) possible hermaphrodite issue(s)!

The fetus's immediate job from a possible of four different available sexes option(s) is to pick one such as either a heterosexual male/female or an alternative gay/lesbian with masculine/feminine qualities of what the fetus or (kid) wants to be after birth and before commencing any of the three different jobs of cellular division, cellular construction and fetal development to avoid any hermaphrodite issue(s)!

Fetus job # 1 on rare occasions makes mistakes by failing to select within time his/her sexual orientation due to its sex-dithering indecision(s) and results with a hermaphrodite issue(s), and therefore both biological parents cannot be held responsible for the fetus's / child's sex-dithering indecision(s) – sorry!

This covers recent world-class news with regards to an Olympian athlete who was born as a hermaphrodite and the parents who possibly were so ashamed that of their kid's birth and so that the individual was then wrongly brought up as a boy right up to his late teens when he decided that he was girl and not a boy together with Olympic Committee(s) legal dispute(s) over the Olympian's sex for his/her contest entry(s) that the teen took part in during the 2012 Olympics and possibly he/she won medal(s) during the 2012 Olympics!

It's best for both these legal and medical reasons of how to deal with this. Firstly, once the child discovered with this it's to be shortly after its birth be granted a reasonable single unisex Christian name together with both unisex clothing and hair-styles while growing up until its eighteenth birthday, in order to avoid being teased / provoked by others due to its un-determined sex. Since no mother of any reasonable standing would ever in her right mind either organize or request to have a hermaphrodite(s) for a child / children –

Option(s)

- a) Full fetal hermaphrodite with chromosome(s) count beta-tests are to be carried out (possibly by using a few injection(s) in to the fetus in order to extract the fetus chromosome(s) as an investigation(s) to see if this is the case within the first 90-days of pregnancy – in order to fix these issue(s)
- b) Immediately and once this has been discovered with either the fetus during the mother's pregnancy or directly after birth, the medical team should advise the mother of this issue and then to immediately medically and scientifically investigate what the correct path should have been for this infant and correctly follow this up with specialist(s) medical team(s) in both surgery and possible psychiatric procedure(s) right up until the child turns eighteen which is usually after he/she has stopped physically growing!
- c) The biological mother should be fully informed of this issue if this is the case within the first 90-days of pregnancy and it's therefore the decision between her doctor(s) and herself of whether she'll carry on with pregnancy and the mother should sensibly act in accordance with medical advice given!
- d) In the case(s) with various different religious order(s) which include(s) Jehovah's Witness(es) where any such refusal(s) of pregnancy termination(s) decision(s) are

chosen – then those religious bodies concerned will be required to fully fork-out right up front and definitely without any bounced funds for both all those child’s humongous eighteen (18) year(s) medical bills and also for those possible staggering legal bills arising out any future law-suit(s) / dispute(s), or even unlawful decision(s) made, and possibly over what male/female clothes he/she can wear, or what male/female public loo(s) he/she can use, as well as whom he/she can wed with in life as either a religious person or not – as no ordinary religious order(s) could comply!

- e) It’s therefore the duty of the state that would have to deal with a sex-dithering and non-decisive “nit-wit” so the child/children concerned are to lose their sex decision choice right(s) due to their own fetal sex-dithering decision(s) failure(s) before their birth of wherever the birth occurred, to pick up this eighteen-year(s) both humongous legal and medical tabs as no ordinary family could even possibly fork-out for these types of funding!

Due to the global implementation listing(s) of all theocracies and sects as out-laws, the results within our planetary system status would therefore be almost strife-less and be in a far better condition than it currently is!

Should any theocracies and sects’ rivals(s) be permitted to flourish or even dominate over any quashed rival(s) – those failed religious order(s) could take offense and could quite possibly involve themselves in some sort of global religious war(s)! So, it’s with great regret that not any theocracies and sects are to be permitted to flourish in any way what-so-ever!

Theocracies and Sects = “Global Diabolical Strife”!

“Religion is the opium of the people” – a quote from Carl Marx! In other words, people have to be controlled by religion or be killed – just like in the French Revolution & also today with any Islamic region(s) as Islamic scholars or readers are possibly instructed to kill us in “Alayah’s” name for it if we fail to convert to their religion!

Numerous past and current global theocracies and sects exists, with each following differing doctrines (Gal. 1:6) which un-leashes televised diabolical strife with the other! Out-law Theocracies as set out within section(s) i-ii / a-k

- a) After already being consigned to the ancient history books “Theocracies” which has no current practical/scientific benefits in our ultra-fast scientific modern world as they should remain there within the past, but can easily be replaced with global linguistics, science and sports as alternatives instead, as these are scientifically far more beneficial and practical to have for any healthy (medically fit) planetary system(s) which would be reasonably free of medical expenses/ills due to current un-healthy chosen life-styles / and trash choices than any squabbling religious planet(s) of differing/dithering nation(s) be-speckled with Theocratic wars!
- b) Any multiple squabbling religious planetary system(s) being portrayed within our societies – if currently applied within the galactic system(s) “Local Group” or either possibly in the near/distant future(s) to our Earth, Mars and to any other possible planets, then once these planets are fully populated with religious nation(s), then all human/humanoid life-forms as we know it – will be-speckle inter-planetary Theocratic wars as differing/dithering Theocracies and Sects = inter-planetary/galactic diabolical strife! This is largely due to differing/dithering “Theocracies” pushing for global dominance over one-another such as Islam wanting to replace Christianity with grenades

and by the multiple barrels of guns – at various different evolutionary time periods and therefore any one Theocratic order will pick on an alternate religion due to their global religious domination beliefs/goals/issues!

Avoid “Religion” due to these following ten (10) issues-

- I. “Theocracies” / divinity aren’t “scientifically provable” nor life’s religious existence, meaning, and its origins, as neither the existence of either any person(s) **spiritual** soul(s) / devine heavenly deity(ies) could be!
- II. “Theocracies” does not tolerate any science at all – as in the case of “Galileo” where on June 22nd, 1633 was judged and was sentenced to formal imprisonment by the Vatican for heresy due to both anger and fear at the pleasure of the Inquisition. During his final interrogation, in July 1633 which concluded with torture threats if he failed to tell the truth, but he maintained his denial despite the threat. The next day his sentence was commuted to house arrest for the remainder of his life due to his scientific discoveries, works, knowledge and beliefs - where after he died on January 8th, 1642 was buried in a small room next to the novices' chapel at the end of a corridor from the southern transept of the basilica to the sacristy!
- III. Any multiple different/rival religious orders’ usually fail(s) to agree with or compliment the other(s) which causes more wars than it’s worth! – Example> Catholic(s) and Islamic(s) don’t agree with the other and never will!
- IV. All theocracies and non-organized religion(s) are an outdated arbitrary superstitious man-made mythological propaganda/drivel concept which was designed centuries ago – during those ancient times in order to keep the masses quiet and fully obedient to the religious order(s)!

V. It's totally un-wise to have both theocracies (religious order(s)) run in conjunction with any respective global state(s) / government(s) within our ultra-fast and modern scientific world due to our planetary system having multiple differing countries, cultures and concepts – as religion(s) are totally outdated arbitrary drivel and alien to our ultra-futuristic planetary system causing huge international clashes / strife with the other(s) – due to multiple alienated states with their religious populous “nit-wits” which they churn-out in to our ultra-fast modern planet! Example> Both Christianity and Islamic myths eternally oppose the other as God is to Satan, as neither of which are “scientifically provable” nor can these two differing and opposing religious orders ever agree with the other!

VI. All different global religions orders' upon the face of this planet including both Christianity and Islam should therefore be out-lawed / ruled-out and classified as planetary “medusas” due to un-provable fictitious man-made arbitrary religious propaganda (garbish/garbage) causing much of the world's strife today! For instance, recent TV news details surfaced of Christian pedophile priests, while the previous Iranian President still wanted by the United States for acts of aircraft terrorism between the 1970's/1980's who took about 34 American hostages from the aircraft and killed them, and then recently preached on television death and the total annihilation of Israel their neighboring state during his Iranian Presidency. Also, the Islamic Imams shows complete hatred towards any civilized westernized peoples and cultures as Iran refers to us as “infidels” from their mosques together with their AK 47 rifles possibly under the Ayatollahs direction as these issues are somewhat rather troubling!

VII. Koran literature fails to tolerate any criticisms from Europeans or westernized peoples, Christians and cultures whether or not within the westernized country(ies) or in any

Islamic region(s) as Islamic scholars or readers are possibly instructed to kill us in “Alayah’s” name for it and also if we don’t convert to Islam. This is totally true as within the recent news horrors of Paris, France due to “Charlie Hebdo” a weekly satirical magazine being published! In other words, according to Islam the Europeans or any modern westernized civilized culture(s) has to take on or adopt Islam without any criticism of it or else – which is definitely not right at all as most westernized people(s) and culture(s) don’t take up Islamic religious beliefs or ways nor do any Islamic peoples ever take up Christianity and so therefore all planetary religious order(s) has to be globally out-lawed due to planetary religious terrorism!

VIII. “Theocracies” totally disagrees with atheists and agnostics

IX. Globally out-law all religious order(s)! If one or possibly both parents are either atheists / agnostics, or that neither of the parents are involved from the same religious orders due to rivalry – then it’s best to avoid teaching “Religion” which totally disagrees with any atheists and agnostics as it’s fictitious man-made arbitrary superstitious religious propaganda without bearing any solid evidence / foundation to support it, nor which can it be scientifically proven, or even any two different rival religious orders fully agree with the other as this possibly would cause more wars than it’s worth – example Christianity verses Islam = Islamic state(s) leader(s) issuing Christians with (fatwas) non-removable death decrees! – This example demonstrates this truth because Ayatollah Ruhollah Khomeini, the Supreme Leader of Iran, on 14 February 1989 issued a fatwa against Salmon Rushdie for his book “The Satanic Verses”!

X. “Earth-Alliance” should globally act to out-law all theocracies, non-organized religion(s) with any religious ceremonies/decrees or services which should be globally denied to religious order(s) to dominate/rule over any individual(s) physical/spiritual fate(s) due

to outdated biblical arbitrary superstitious man-made mythological propaganda/drivel concept(s) which was designed over two centuries ago without any full and compressive scientific foundation(s) within it – as any left-out theocracies could possibly participate in global strife/troubles if they do discover any rival or differing religious beliefs being globally offered/taught while they were denied.

XI. Theocracies were created and implemented over two centuries ago during ancient biblical times in order to keep the ill-informed and un-educated masses totally quiet and fully obedient to those religious order(s) concerned which should be avoided within our ultra-modern scientific world!

Examples!

Either with atheist or agnostic parents should avoid having any religion taught to their children as real troubles would ensue if religion is ever taught to them as it totally disagrees with any fictitious man-made arbitrary religious propaganda without having any full and compressive scientific proof!

Parents with rival religious orders to the other for example if say one parent is a Catholic while the other is a Protestant and either an aunt or uncle or someone within the family is a “Jehovah’s Witness” then avoid having any religion being taught to any biological or adopted children as it would result in troubles if any rival or differing religious beliefs is taught to the children due to religions clashes!

Heterosexual / Gay or lesbian parents with any biological or adopted gays or lesbians for children should avoid having any religion taught to them as real troubles would possibly ensue, as all religious orders totally fails to accept these un-alterable biological facts because they can't cope with this! It's medically not possible to convert gays or lesbians in to heterosexuals or force them in to living as heterosexuals for a complete life-time and therefore divorces with possibly bitter custody battles will result at some stage without fail!

Any Christian families either living within or visiting an Islamic state would be required to convert to Islam and would not be allowed to practice their Christian beliefs while there – as they'll surely be put to death if they do! Islamic religious orders aren't flexible, and therefore Islamic peoples don't convert to any westernized religious orders nor any westernized Christians if converted to an Islamic order don't ever convert from their adopted Islamic order back to any westernized religious orders again!

A world-class unified planetary system with its populous fully educated without partaking in any of the following – would therefore be almost stifles and be in a far better condition than it currently is!

I. Islamic and westernized religious order(s) which fails to allow any religious order(s) with cross-religious platform(s) worship – nor any Christian Scientist(s) / “Jehovah Witness(es)” allow their minor child/children to undergo any blood transfusion(s) or possible general surgery(s) due to their religious belief(s)

- II. cross-border(s) with international drug(s) and gang(s) wars
- III. money-laundering
- IV. brothels inflicting the populous with multiple global sexual diseases as viral mushroom clouds and the different state(s) having to fork-out the humongous medical tab(s) some of which are non-treatable and result(s) in death(s)!
- V. human slavery/trafficking
- VI. exotic/precocious museum(s)art(s)/painting(s)/sculpture(s) fashion(s) / jewelry / photography with photographic equipment / perfume smuggler(s)/tax dodger(s) annually cost(s) millions globally – in lost tax revenue(s)!

So it's mainly for these valid reasons that this global governance in the form of a Global/Worldly Presidential Office together with both Global Congress and Global Senate would therefore be required to be established with education, national defense, justice, and space administration, along with all branches of both executive and state governance to be collectively known as "Earth-Alliance" or "EA" for short as a world style of governance and should be permanently maintained – which brings real hope and great joy!

Chinese Martial Arts/Psi-Cop(s)

Babylon 5 “Psi-Corps” short for “Psionic Police” with a Psi-Corps quote “The Corps is Mother, the Corps is Father”.

As there’s no solid/valid scientific evidence to support any existence of “psionic” abilities, therefore both complete “Chinese Martial Arts” together with “Transcendental Meditation” graduate(s)/recruit(s) are to be drafted and retained even after reasonable “Psionic” discoveries are found – until other-wise!

Chinese Police are to draft “Chinese Martial Arts” graduate(s) into their “Martial Arts” Division or “CPMA” as rookie(s) to start with – in which all these recruits are to be fully trained as “Chinese Police Martial Arts Commander(s)” over a three/five-year(s) period using their martial arts skills together with Transcendental Meditation {TM} in both criminal combat as career(s) within their Chinese Police Martial Arts Division for discipline and meditative concentration.

An immediate complete three/five-year(s) intense Psi-Cop(s)/Commander(s) training program commences once reasonable “Psionic” abilities are discovered with any Chinese Martial Arts Police rookie(s) which is to be granted as a prestige career preference choice(s) package on offer to all Chinese Martial Arts graduate(s)!

CPMA which are to be based upon the Babylon 5 Earth-Alliance Psi-Corps character(s) of “Talia Winters” and “Brian Bester” working within the Babylon 5 universe – who are to be fully NASA/ESA taught in Aero-Space/Aviation / Military and Secret Services with Psionic Technologies once these abilities becomes available, advanced/applied physics, quantum mechanics while the US Air Force concurrently provides complete Aero-Space/Aviation-Military/Civilian Law course(s) – together with complete Chinese Martial Arts training including Transcendental Meditation, in both daily, weekly, physical and mental/psionic/psychological fitness exercise(s)/program(s) which includes CNN who teaches Current Affairs/News events for their scientifically based career(s).

CMA/P applies/uses/teaches Aero-Space Technologies, Aero-Space/Aviation-Military/Civilian Law science, logic, practicality, wisdom and good moral value(s) to those troubled individual(s) within the differing stages of their live(s) with cake-walk option(s) to those who may require it through any simple or complex issues/troubles which may un-fold upon any of their different lives to the best of possible choice(s) rather than upon any non-provable religious belief(s)/trash as it totally replaces all global religion(s) so that they're never a burden to any of their families, organization(s) for whom they are employed, nor within any of the different countries states in which they reside during their natural life-time!

CMA/P are to fully provide both relevant Aero-Space scientific knowledge together with practical and logical wise counsel/guidance as maybe necessary to any troubled worker(s)/colleague(s), family member(s), friend(s) and stranger(s) as a space career(s).

Ternary Presidential Candidates Selection Committee

Although United States Court of Appeals is the most inexpensive option, most president(s) seem to reject this option due to this constant complaint made as they can't cope/take any of these college type courses of being cooped-up in a hall, and the final-straw which broke the camel(s) back was "although an excellent financial option - this would take all the fun out of out-doors canvasing". (These two issues were outlined to me by President Bill Clinton through one of his 1992 Democratic Presidential Victory Campaign Speeches he gave in which I had assisted The Democrats while I was out leafleting for them in California, USA, during the 1992 election!)

The "Ternary Presidential Candidates Committee" are to be parliamentary chosen for life – and once approved are to be inaugurated by the "United States Court of Appeals for the Ninth Circuit" which comprises of twenty-seven members with a ternary division of nine Democrats, Republicans, and Liberals.

Due to both inter-party and cross-party spats with the various different parties and candidates on offer which occurs in each given leap year during a presidential race – the "Ternary Presidential Candidates Selection Committee" are to put all presidential candidates through twelve multi-weeks' rigorous beta-tests, which consists of a forty-five hours per work week scenario, with each week based on its five working days, and each day with nine hours, over a ninety (90) days duration period, to determine whether or not the three remaining/surviving parties – each with their own single candidate, a Democrat, a Republican, and a Liberal, are fully suited for his/her chosen four years' presidential career!

"US Vernal Equinox Presidential Candidates Beta-Tests" selections for all the chosen Presidential Candidate(s) commences upon the "US vernal equinox" (March 21st) of each given leap year of every presidential election year, in which the committee are to rigorously beta-test all three major parties candidates simultaneously with each party having no more

than their twenty-seven permitted from an eighty-one maximum presidential candidates allowed within an “US Court of Appeals” large provided hall over a ninety days’ duration period in the following areas, ...

XII. Compos mentis, well-balanced, and logical requirements> The presidential candidate must by totally compos mentis, well-balanced, and also logical. Tournament Chess or possibly some other computer game(s) could be used to determine the candidates’ actual logical abilities. The Dynasty TV Series teaches us who not to hire for a current president and what to avoid regarding obtaining luxurious fashions during our current hard times, and those back-stabbers, with Alexis Carrington-Colby who’s a passionate and yet a vengeful expert!

XIII. Upon day one, all presidential candidates are to under-go an US Air Force doctors medical examination as they’re not permitted to use their own doctors for both the physical and mental competence – because the candidate(s) can’t be accepted if he/she are irrational, un-balanced, dither(s), or back-walks in any way – just like Alexis Carrington-Colby does within the Dynasty TV Series! Also it doesn’t bode well if a president dithers, is irrational, un-decisive, or fails to fully work out all his/her decisions in which back-lashes consequences/issues erroneously results, usually just after not properly acting upon issues, which should have been fully and correctly worked out in the first place, or back-walks upon irrational statements made!

XIV. Agnostics – Atheists & Global Religious Strife - due to un-provable fictitious man-made arbitrary religious propaganda (garbish/garbage) causing much of the world’s strife today!

XV. Bi-lingual / Multi-lingual Presidential Candidates due to Gaia our planetary linguistics

requirements with at least Spanish and the possibly of Portuguese for their second and third languages as an added bonus option

XVI. Computer Technologies & Communications – Cyberspace / Social Networks – all

government bureaus which includes every government employee cannot be permitted to hold, or use or even be able to retain any private ISP's / servers for "National Security" reasons, and will only be granted an US Federal ISP single account with presidential exceptions to the current president in office as the current president's ISP account must be provided solely by the Central Intelligence Agency (CIA) located in Langley, Virginia and not by the FBI. The provided ISP for both the internet together with a personalized government site with some web space allocated which details their job description(s) which is to have some relevant up to date government blog stuff on it and an e-mail account for their communications due to possible future "Computer(s) Data / Communications Security Breaches" caused by either inadequate security or hackers/leaks to be classified as "Computer(s)/Data-Gate" or an "E-mail-Gate"!

XVII. Current/Internal/Foreign Affairs & Policies

XVIII. Economics

XIX. Education

XX. Employment & Excellent Job Opportunities

XXI. Energy

XXII. Environment & Global/National Geology & History

XXIII. Federal Reserve - National / International Finances – due to multiple countries with debts/stock market(s) crashes & global/biblical jobless plagues

XXIV. Health / Welfare & Social Security

XXV. Justice – Global Law & Order

XXVI. Media – Internet / Radio / Television & how the respective candidates are to communicate with the press

XXVII. National Aerospace and Aeronautics Administration / European Space Administration

XXVIII. National / International Armed Forces – Defense & Secret Services (CIA) – Global Security

XXIX. National / Global Up-To-Date Political Affairs/Policies

So now after their ninety days' beta-tests the three surviving candidates consisting of, a Democrat, a Liberal, and the Republican are to hit the road with their approximate remaining five months with a positive national out-doors canvassing campaign and without back-stabbing their rivals, as this is somewhat rather rampant within the Dynasty TV Series, until voting day - where each candidate legally can't continue as the voters decides the general election results!

Most of the past Presidents had served with the following back-grounds, ... Film Actors, Law/Legal, Oil, & Peanut Farmers!

Gaia Motion Picture Film Association/Censors

Gaia complete with all her various differing global film censors' together with their countries censorships ratings of various commercially released motion picture films from their different respective countries are to be under one large Gaia government-based bureau-organization within Hollywood, California, United States, which is to address these humongous Federal Bureau of Investigation (FBI) issues/solutions with regards to all motion picture films once released, could possibly be the by-product(s) of either criminal/misuse!

In the interests of global motion picture piracy and security – it's best to rather globalize the film censors as a Gaia / global based censorship authority to be known as “Gaia Motion Picture Association/Censors” in which all global film classifications should be solely done possibly through a Hollywood based film censorship board together with its “Gaia film certification” in order to avoid any problems!

- I. All current and any new commercially released motion picture films on DVD/Blue-ray are no longer to be produced nor marketed – but instead are only to be rented/sold as downloads which can be viewed by using his/her Ultra Violet unique film purchase number which is only used for the film(s) rental/purchase via the customers accredited online film account together with their registered home address, credit card, ISP/IP address and broadband phone-line as multi-regional movie(s) without any regional motion picture film(s) code(s) due to various fraudulent/piracy activities and possible films security issues! – such as either Microsoft Windows 10 / Windows server 2022 datacenter – under beta-tests with this option it already correctly works in which the movie is solely viewable online from within a single Microsoft person's account purchased via Microsoft “Movies & TV” done within Windows 10 as it can't be viewed from any alternative Microsoft customer's account!

- II. As respective film customers can currently circumvent banned films from a given country with internet orders so this option will be blocked as set out within (d) below!
- III. Some customers have ulterior film motives who possibly do sell DVD's/Blue-rays under black-market options!
- IV. Any given countries banned commercial film(s) are to be globally blocked for release through "Gaia Motion Picture Association/Censors" which therefore are not be orderable from alternative countries by a film customer(s) as they cannot circumvent this world ban by trying to order the banned film over the internet!
- V. Due to some customers with ulterior film motives who possibly sell DVD's/Blue-rays under black-market options – this now would no longer be possible!

It's best to only either rent/sell all commercially released motion picture films solely through any "Gaia Accredited Motion Picture Film Organization(s)" – as follows!

- a. Amazon
- b. Buena Vista
- c. Columbia Pictures
- d. MGM
- e. Microsoft
- f. Netflix
- g. Sony Pictures
- h. United Artists
- i. Universal
- j. Walt Disney

An unique Ultra Violet film purchase number coupon is to be solely provided for internet downloads/viewing of movies which is only done from within any of the movies optional language(s) choice(s) through the <adjustable> “Gaia Accredited Motion Picture Film Organization(s)” customers online account without these movies being either rented/sold upon any physical optical discs!

All rejected film(s) classification(s) of motion pictures made/produced which includes any required censors’ cinematic film(s) cut(s) or any bureau censorship decision over-turns should never be legally challengeable by the organization(s) for either revenue/stories loss at some future time-point!

Global Academy Centers

Adjustable Business “Academy Center” – Example(s) Listings>

Linguistics Academy Centers – Example “LAC”>

The “Linguistics Academy Centers” for multiple languages and translator abilities – multiple beta-tests within the States has shown that small young three-year-old American Latino children are excellent with linguistics as they’re fully able to learn at least two or possibly three different languages with no troubles at all so these tiny youngsters are best placed here!

Microsoft Academy Centers – Computerized Example “MAC”>

“Microsoft Academy Centers” to be opened with each new student entering are possibly aged between five and seven years and above is to fully beta-tested for a possible computerized future and if the student pass these tests then either he/she will be taught from that first year and onwards up until age twelve or thirteen by Microsoft themselves and not by the state! This means that after the students’ training program is complete, the student graduates with full Microsoft qualification(s) and with an excellent guaranteed job at Microsoft and therefore will not be any burden to either his/her parents nor to the state!

I. Accountants – with Chartered Account options

II. Airline, Cabin, Pilot and Travel Industry

- XVIII. Finance / Chartered Accountants / Banking with Money Management and How to avoid
getting into any Bad Debts as this is vital to be taught to all due to three-quarters of
the planet with large debts!
- XIX. Genetics – Reproduction of regular, giants, dwarfs/midgets and pigmies by Heterosexual
with Gays/Lesbians as almost all supported life-populated planetary systems within
this universe would be predominantly heterosexual such as this planet with a
likelihood of about 75% (three quarters) that will be heterosexual for its planetary
majority, together with the minority 20% (a fifth) divided up in to both gays and
lesbians while the last remaining 5% (a twentieth) are split three ways in to,

dwarfs/midgets, giants, and pigmies as all these different groups of people will have to adopt their own biological facts whether they like it or not and just live amongst the rest of the planet's population just as any ordinary regular people would do.

Biologically all humans upon this planet contains 46 chromosomes which are split up as 23 dual x / y chromosomes in their paired-groups.
